QA Arithmetic – 01

Basics of percentage

Question 1

In an election between two candidates, the candidate who gets 30% of the votes polled is defeated by 15,000 votes. The number of votes polled in favour of the winning candidate is

(1) 11,250

(2) 15,000

(3) 26,250

(4) 37,500

Question 2

Out of the shirts produced in a factory, 15% are defective, while 20% of the rest are sold in the domestic market. If the remaining 8840 shirts are left for export, then the number of shirts produced in the factory is

(1) 13600

(2) 13000

(3) 13400

(4) 14000

Question 3

A college has raised 75% of the amount it needs for a new building by receiving an average donation of Rs. 600 from people already solicited. People already solicited represents 60% of people, the college will ask for donations. If college is to raise exactly the amount needed for the new building, what should be the average donation (in Rs.) from remaining people to be solicited?

Question 4

The income of Amala is 20% more than that of Bimala and 20% less than that of Kamala. If Kamala's income goes down by 4% and Bimala's goes up by 10%, then the percentage by which Kamala's income would exceed Bimala's is nearest to

(1) 29

(2) 31

(3) 28

(4) 32

Question 5

A vendor sells 30% of his fruits and throws away 40% of the rest of the fruits. Next day he sells 50% of the remainder fruits and throws away the rest. What percent of the fruits does the vendor throw?

(1) 51%

(2) 49%

(3) 63%

(4) 72%

Question 6

In a tournament, a team has played 40 matches so far and won 30% of them. If they win 60% of the remaining matches, their overall win percentage will be 50%. Suppose they win 90% of the remaining matches, then the total number of matches won by the team in the tournament will be

(1) 86

(2) 84

(3) 80

(4) 78

Question 7

Gun powder contains 75% nitre, 10% of sulphur and the rest is charcoal by weight. If quantity of gunpowder is 24 kg, then what is the weight of charcoal?

(1) 3.6 kg

(2) 4.5 kg

(3) 5 kg

(4) 5.5 kg

Question 8

A and B are two friends, each having at least a rupee. If A gives B a sum of Rs. 20, then A has 40% of the amount with B. If B gives A, a sum of Rs. 40, then B will have 40% of the amount with A. What is the amount (in Rs.) with A initially?

Question 9

In a certain town, people are either married or unmarried. Similarly, either they work or they don't work. 37% of the total population was married and 76% of the married people were working. Similarly, 54% of the unmarried people were working. If the total number of people who work was 1,24,280, then the total population of the town was:

(1) 90,000

(2) 2,00,000

(3) 1,80,000

(4) 2,16,000

Question 10

A watermelon is kept under sun for 3 days. Due to which its water content reduces from 85% to 80%. If 3 kg of water got evaporated, then what was the initial weight (in kg) of the watermelon?

Question 11

Fresh grapes contain 80% water by weight while dried grapes contain 20% water by weight. What is the weight of dry grapes available from 40 kg of fresh grapes?

(1) 4 kg

(2) 5.5 kg

(3) 10 kg

(4) None of these

Question 12

Two lumps having mixture of gold and silver together weighs 20 kg. One lump contains 75% gold and 31.25 gm silver per kg. Another lump contains 85% gold and 30 gm silver per kg. Total quantity of silver in two lumps is 617.5 gm. If two lumps are melted to form one, then percentage of gold in it will be

(1) 75%

(2) 87%

(3) 15.6%

(4) 78%

Question 13

A candidate scores 39% of the maximum marks and fails by 58 marks, while another candidate who scores 55% of the maximum marks, gets 22 marks more than minimum required marks to pass the examination. Find maximum marks of examination.

(1) 450

(2) 650

(3) 500

(4) 550

Question 14

In an examination, the maximum possible score is N while the pass mark is 45% of N. A candidate obtains 36 marks, but falls short of the pass mark by 68%. Which one of the following is then correct?

(1) $201 \leq N \leq 242$.

(2) $N \geq 253$.

(3) $N \leq 200$.

(4) $243 \leq N \leq 252$.

Question 15

A factory has 900 employees, 25% of whom are men. The factory has to hire 200 additional employees to increases production. What percentage of the additional employees hired must be men in order to raise the percentage of men employees in the factory to 35%? (Assume transgender for this situation.)

(1) 70%

(2) 90%

(3) 75%

(4) 80%

Question 16

If sides of a square is increased by 30%, then what is the percentage increase in its area?

(1) 9%

(2) 30%

(3) 60%

(4) 69%

Question 17

The price per unit of an article decreases by 4%, and the consumption (in units) decreases by 8%. The expenditure would decrease by

(1) 12%

(2) 12.32%

(3) 11.68%

(4) 4.32%

Question 18

During a landscaping operation, the length of a rectangular garden is decreased by 10% and its breadth is increased by 10%. The area of the new rectangular garden is:

(1) Decreased by 1%

(2) Decreased by 10%

(3) Increased by 1%

(4) Neither increased nor decreased

Question 19

If the price of a bicycle is increased by 9.09%, then by 8.33% and then by 7.7%, the price becomes Rs. 1,274. What is the original price of the bicycle?

(1) Rs. 999

(2) Rs. 1,001

(3) Rs. 1,100

(4) Rs. 1,150

Question 20

If the price of Sugar increases by 20%, and Salman intends to spend only an additional 5% on Sugar, then find out the percentage decrease in his sugar consumption.

(1) 5.25

(2) 12.5

(3) 11.75

(4) 10.25

Thanks!
